THE APPLICATION IDENTIFIED ABOVE HAS BEEN EXAMINED AND IS ALLOWED FOR ISSUANCE AS A PATENT. **PROSECUTION ON THE MERITS IS CLOSED.** THIS NOTICE OF ALLOWANCE IS NOT A GRANT OF PATENT RIGHTS. THIS APPLICATION IS SUBJECT TO WITHDRAWAL FROM ISSUE AT THE INITIATIVE OF THE OFFICE OR UPON PETITION BY THE APPLICANT. SEE 37 CFR 1.313 AND MPEP 1308.

THE ISSUE FEE AND PUBLICATION FEE (IF REQUIRED) MUST BE PAID WITHIN **THREE MONTHS FROM THE MAILING DATE OF THIS NOTICE** OR THIS APPLICATION SHALL BE REGARDED AS ABANDONED. **THIS STATUTORY PERIOD CANNOT BE EXTENDED.** SEE 35 U.S.C. 151. THE ISSUE FEE DUE INDICATED ABOVE DOES NOT REFLECT A CREDIT FOR ANY PREVIOUSLY PAID ISSUE FEE IN THIS APPLICATION. IF AN ISSUE FEE HAS PREVIOUSLY BEEN PAID IN THIS APPLICATION (AS SHOWN ABOVE), THE RETURN OF PART B OF THIS FORM WILL BE CONSIDERED A REQUEST TO REAPPLY THE PREVIOUSLY PAID ISSUE FEE TOWARD THE ISSUE FEE NOW DUE.

HOW TO REPLY TO THIS NOTICE:

I. Review the SMALL ENTITY status shown above.

If the SMALL ENTITY is shown as YES, verify your current SMALL ENTITY status:

A. If the status is the same, pay the TOTAL FEE(S) DUE shown above.

B. If the status above is to be removed, check box 5b on Part B - Fee(s) Transmittal and pay the PUBLICATION FEE (if required) and twice the amount of the ISSUE FEE shown above, or

REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: the specific limitations of "...driving the radiation source with the threshold current increased with the delta current (I_{Δ}) for obtaining the predetermined radiation power, wherein the delta current is calculated from the threshold current by using a function F which is a model for the relation between the threshold current and the delta current and the radiation power, characterized in that the method further comprises the step of c) calibrating the function F , comprising the substeps of c1) determining the radiation power and the delta current at least two different threshold currents when the radiation source is driven in the first mode, and c2) updating at least one parameter of the function F by using the measurements in substep c1.", in the combination as claimed in claim 1. The specific limitations of "...estimated delta current generator for generating an estimated delta current which is calculated from the threshold current by using a function F which is a model for the relation between the threshold current and the delta current and the radiation power, delta current outputting means for outputting the delta current wherein the online delta current is outputted when the radiation power is measured and the estimated delta current is outputted when the radiation power is not measured, characterized in that the radiation source driving device further comprises calibration means for updating at least one parameter of the function F , wherein the delta current the threshold current and the measured radiation power are fed to the calibration means and wherein the radiation power and the delta current are determined

at least two different threshold currents and are subsequently used to update the at least one parameter.” in the combination as claimed in claim 7.

2. Burley discloses: measuring the radiation power emitted by the radiation source using photodiode (42) (Figures 3, Col 4, Lines 3-16); the addition means is inherently a part of the laser drive means (12) and laser bias means (14) since the current outputted is the threshold current and the current above threshold (Figure 3, Col 3, Lines 27-60). Burley does not disclose: a threshold current determining means, a delta current determining means, delta current generator, estimated delta current generator, delta current outputting means and calibration means. Everett discloses: delta current determined based on the threshold current (Figure 2, [0034]); delta current is a function of temperature such that the output power of the laser can remain constant (Figure 2, [0034]); control unit (31) and current driver (30) (Figure 2, [0034]).

3. However the prior art of record fails to teach or suggest: the specific limitations of “...driving the radiation source with the threshold current increased with the delta current (I_{delta}) for obtaining the predetermined radiation power, wherein the delta current is calculated from the threshold current by using a function F which is a model for the relation between the threshold current and the delta current and the radiation power, characterized in that the method further comprises the step of c) calibrating the function F , comprising the substeps of c1) determining the radiation power and the delta current at least two different threshold currents when the radiation source is driven in the first mode, and c2) updating at least one parameter of the function F by using the measurements in substep c1.”, in the combination as claimed in claim 1. The specific

limitations of "...estimated delta current generator for generating an estimated delta current which is calculated from the threshold current by using a function F which is a model for the relation between the threshold current and the delta current and the radiation power, delta current outputting means for outputting the delta current wherein the online delta current is outputted when the radiation power is measured and the estimated delta current is outputted when the radiation power is not measured, characterized in that the radiation source driving device further comprises calibration means for updating at least one parameter of the function F, wherein the delta current the threshold current and the measured radiation power are fed to the calibration means and wherein the radiation power and the delta current are determined at least two different threshold currents and are subsequently used to update the at least one parameter." in the combination as claimed in claim 7.

4. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
